

Structure

Information Architecture

A simple tree structure using a horizontal navigation bar at the top of the screen which will take up 100% of the screen width.

Interaction Design (IXD)

- Site logo will take users back to the home page as well as having Home on the Navigation Bar.
- All pages will contain a navigation bar at the top of the page then a logo, content and finally the footer at the bottom allowing ease of access for users.
- Each nav bar menu item will change color so the users know that clicking it will have an action.
- Each link in the footer section will also change color so that users know that clicking it will have an action.
- When viewing on a mobile device, the second paragraph of the Introduction will not display to reduce the amount of content on the screen and prevent it from becoming cluttered.

- Users will be prompted to click a button on the home page that will open a modal which will take them to the booking's page.
- The booking page will contain a form with a drop down date selector with a submit button, and inputs for Name, Address, Email and Contact Number, there will also be a check box so that the site remembers the users details, there will also be a submit button to submit the information entered.
- The albums page displays Metallica's album covers users can click on the album cover and it will open a Wikipedia page that gives them information all about the selected album.
- The audio player is located on the albums page and will play 25 of Metallica's back catalogue of the band's greatest hits.
- The gallery page will display 16 pictures from various concerts around the world.
- There will be a sign up page which will allow users to join the Metallica fan club, the page will contain a form which has inputs for Name, Email, Password and Repeat Password, there will also be a remember me checkbox and a submit button.
- The social links for YouTube, LinkedIn, Instagram, Snapchat, Twitter and Wikipedia will all open in a blank window.
